## Above Ground Utility Permit

Your request for permission to install a \_\_\_\_\_ line across County Road No. \_\_\_\_\_ in Section \_\_\_\_\_ and/or along County Road No. \_\_\_\_\_, starting in Section \_\_\_\_\_, running through Section \_\_\_\_\_, is granted when properly signed below by the Carbon County Road & Bridge Superintendent or his authorized agent.

The Carbon County Road & Bridge Department must be informed of the start date of all construction in order to provide inspection during construction. All extraordinary costs relating to the in inspection of such utility installation will be borne by the permittee.

All requests for installation will be reviewed in the field by representatives of Carbon County, Wyoming, prior to any issuance of any permit.

This work shall be completed within \_\_\_\_\_ days from the issue date. No work shall be allowed on Saturdays or Sundays, unless otherwise approved.

It is understood that the Permittee will cause installation at no expense whatsoever to Carbon County and the Permittee will own and maintain the same after installation.

The Permittee shall maintain the installation at all times and agree to hold Carbon County, Wyoming the agencies thereof, and their officers and employees harmless from any and all less and damage or any claims which may rise out of or be connected with the installation, maintenance, alteration, removal or presence of the installation herein referred to or any work or facility connected herewith, within the area covered by this permit. Carbon County, Wyoming does not warrant County right-of-way. The Permittee shall determine all ownership and property lines.

This work must be accomplished in accordance with accepted good practices and conform to the recommendations of the National Electric Safety Code and to such statutes as are applicable.

As a general rule, utilities will not be located under the roadway surface or immediately adjacent to the roadway surface, except for under road crossings. That Public utilities including but not limited to; utility line poles, cables, and all buried public utilities will be as far as possible from the center line of the roads. You may come in 2 (two) feet from the edge of the Right-of-Way is all.

Poles, meters, pedestals, and other points of access, that are to be placed within the road right-of-way shall be approved by Carbon County, Wyoming.

Any materials from excavation as the result of utility installation will be removed from the highway and surface each day.

All necessary new gravel and/or asphalt shall be placed on all surfaces where any damage has occurred to the road surface from equipment, or storage of material. Carbon County, Wyoming, shall determine the damaged areas and depth of new gravel.

If it becomes necessary to change the location of the proposed line, written approval must be secured from Carbon County, Wyoming.

Permittee will be required to shut off lines and remove all combustible materials from the County right-of-way when requested to do so by Carbon County, Wyoming, because of necessary highway construction or maintenance operations.

Construction warning signs, conforming to the Uniform Traffic Control device Manual and to the Supplement, shall be in place daily prior to starting any work. If proper signs are not in place during any work, the County Superintendent or his authorized agent shall immediately stop all work until proper signs are in place.

The applicant shall notify the local police, ambulance, and fire department stating duration of all road closures. All road closures must be approved the Board of County Commissioners by official resolution.

For utilities, regardless of installation, permit fee shall be \$0.05 per lineal foot with a minimum fee of \$100.00.

Carbon County, Wyoming, may require a non cancellable cash or surety bond to insure compliance with the provision of this permit. The bond will remain in effect for a period of one year after all work has been completed. The total amount of the bond will be determined by Carbon County, Wyoming.

In the event any changes are made to this roadway in the future that would necessitate removal for relocation of this installation, Permittee will do so promptly at its own expense upon written request from Carbon County, Wyoming. Carbon County, Wyoming will not be responsible for any damage that my result in the maintenance of the highway or to the installation placed inside County right-of-way limits.

In accepting this permit the undersigned, representing the permittee, verifies that he/she has read and understands all of the provisions, that he/she has authority to sign for and bind the permittee; and that by virtue of his/her signature the Permittee is bond by all the conditions set forth herein.

## **Supplementary Specification For Identifying Utilities**

The Supplementary Specification supplements, amends and where in conflict therewith, supersedes various sections of the Wyoming Department of Transportation's STANDARD SPECIFICATIONS FOR ROAD & BRIDGE CONSTRUCTION, due to changes to W.S. 37-12-301 et seq., known as the Wyoming Underground Facilities Notification Act.

Description: Due to the changes in the Wyoming Statutes governing the notification and protection of buried utilities, the Carbon County Road & Bridge Department has adopted the following procedure:

While every effort has been made to show the location of all utilities and/or pipe lines in their existing location at the time the plans were prepared, due to various changes these facilities may not be as shown. Some facilities may have been relocated by the Department under separate agreement and others allowed to remain in the construction area.

It is the responsibility of the Contractor to contact all utility and/or pipe line companies in the area of the planned work and secure exact locations for those facilities. The Contractor shall request the owner of the utility to provide the nature, location and elevation of the utility of each location and whatever interval is necessary for the work. If the utility company cannot or will not provide the information, the utility shall be tied both horizontally and vertically, by coordinated, to a datum determined by the Carbon County Road & Bridge Department and certified by a licensed surveyor. The Contractor shall show the nature, location and elevation of the utility on the Carbon County Road & Bridge Department's contract plans and provide a copy of the information to the Carbon County Road & Bridge Department, P.O. Box 487, Rawlins, WY 82301. No excavation operations shall take place until all utilities have been contacted and locations and elevations of the utilities confirmed.

While more visible and not included in the underground utility law, overhead utilities should also be recognized by the Contractor as a hazard. The Contractor is required to abide by W.S. 37-3-301 et seq., known as the Wyoming High Voltage Power Lines and Safety Restrictions Act before beginning any work under or near the utility.
