### ***Instructions for Rig/Wind Turbine Move Permits***

1. These permits are valid for a 5-day period and are valid for the route listed on the permit only.
  - a. If an extension is needed because of extenuating circumstances, please contact Carbon County Road and Bridge.
2. These permits are valid for the movement of the rig/wind turbine and supporting components. The permits need to be completely and properly filled out and present in the vehicle.
  - a. Eighty (80) oversize and/or overweight loads within Class C limits (less than 160,000 pounds are included.)
  - b. Five (5) Class A permits for loads over 160,000 pounds are also included.
  - c. Oversize and/or overweight equipment that are facilitating the move but not an actual component of the rig/wind turbine are not included in the permit. Those permits will need to be purchased separately and/or if within Class C and B limits, can be self-issued.
3. All loads must comply with oversize and overweight rules, safety regulations, and permit class maximums.
4. Oversize load signs with proper flagging are required on all oversize loads.
5. Rig/wind turbine move permits are an alternative to individual load permits and will be issued when requested 72 hours prior to the move.
6. Sub-contractors are allowed to use your permits but is your responsibility to verify they have valid
  - a. Wyoming Contract Operating Authority, Wyoming registration, Current liability insurance coverage beforehand.
7. The 5 super load permits need to be returned to Carbon County Road and Bridge within 72 hours of completion of the move.
